ELSEVIER

Comput. Methods Appl. Mech. Engrg. 145 (1997) 411–412

Computer methods in applied mechanics and engineering

Contents Volume 145

Volume 145, Nos. 1–2, 15 June 1997

Differential cubature method: A solution technique for Kirchhoff plates of arbitrary shape
K.M. Liew and F.-L. Liu 1

TRIC: a simple but sophisticated 3-node triangular element based on 6 rigid-body and 12 straining modes for fast computational simulations of arbitrary isotropic and laminated composite shells
J. Argyris, L. Tenek and L. Olofsson 11

A comprehensive unified set of single-step algorithms with controllable dissipation for dynamics. Part I. Formulation
S.C. Fan, T.C. Fung and G. Sheng 87

A comprehensive unified set of single-step algorithms with controllable dissipation for dynamics. Part II. Algorithms and analysis
S.C. Fan, T.C. Fung and G. Sheng 99

A numerical method for axisymmetric wave propagation problem of anisotropic solids
K. Liu, X. Li and X. Sun 109

Seismic response of reinforced concrete buildings close to deep excavation
Y.L. Mo and J.M. Hwang 117

Qualitative analysis of non-linear dynamical systems
J. Agarwal, D.I. Blockley and N.J. Woodman 135

Passive and active design of hard disk suspension assemblies using multiobjective optimization techniques
Y.-P. Yang and C.-C. Kuo 147

A refined asymptotic theory and computational model for multilayered composite plates
J.-Q. Tarn and Y.-B. Wang 167

Nonlinear stress analysis problems by spectral collocation methods
A. Cividini and E. Zampieri 185

Volume 145, Nos. 3–4, 30 June 1997

A perturbation method for the determination of the buckling strength of imperfection-sensitive structures
B. Wu and Z. Wang 203

Spreadsheet simulation of the moving boundary of the one-phase Stefan problem
A. Kharab 217

A wall-distance-free low Re $k-\epsilon$ turbulence model
U. Goldberg and D. Apsley 227

Parameter sensitivity of inelastic buckling and post-buckling response
M. Kleiber and T.D. Hien 239

The equilibrium method for local, a posteriori, pointwise estimation of the finite element error
J. Hugger 263

Large displacement analysis of thin plates and shells using a flat facet finite element formulation
J.L. Meek and S. Ristic 285

3D simulation of fluid–particle interactions with the number of particles reaching 100
A.A. Johnson and T.E. Tezduyar 301

An improvement of convergence in Newton's method
S. Lopez 323

$b = \int g$
F. Brezzi, L.P. Franca, T.J.R. Hughes and A. Russo 329

Assessment of continuum models for sandwich panel honeycomb cores
W.S. Burton and A.K. Noor 341

Non-overlapping domain decomposition methods for adaptive *hp* approximations of the Stokes problem with discontinuous pressure fields
P. Le Tallec and A. Patra 361

Homogenization of a thermal problem in the plate of a heat exchanger
M'B. Taghite, A. Rahmattulla, H. Lanchon-Ducauquis and K. Taous 381
